TYPE 27 & QUICK CHANGE RED REX CLEANING DISCS

Red REX Cleaning products feature a distinctive open web construction, ensuring excellent resistance to material loading. Our advanced Red REX line incorporates a more durable resin and grain composition, reinforced by a thicker nylon filament. This innovative material minimizes heat generation during use, outperforming wire brushes and conventional abrasives.

KÖLN RED REX TYPE-27

KÖLN FIRMLAK QUICK CHANGE CERAMIC DISCS

FirmBak Quick Change Discs deliver superior stock removal with a durable, rigid backing that minimizes tearing and snagging, common in standard quick-change discs. Their aggressive ceramic grain, paired with an anti-loading topcoat, ensures cooler operation while efficiently grinding tough materials. Perfect for high-nickel alloys and challenging gummy materials like stainless steel. These discs are available with Type-R or Type-S fastening systems for quick and easy tool changes.

KÖLN FIRMLAK QUICK CHANGE CERAMIC DISCS

Backing pads can be found in our E-catalog, page 85.

PSA AND HOOK & LOOP (VELOUR) DISCS

Köln Film Discs are the perfect solution where durability and flexibility are critical. Featuring precision-cut aluminum oxide grains bonded to a uniform polyester film substrate, they deliver exceptional cutting speed and consistent finishing. The anti-loading topcoat minimizes clogging and friction, significantly boosting performance and longevity. Available in PSA or Velour attachment systems for versatile application.

HYBRID FLAP DISCS

Our innovative Hybrid (Interleaf) Flap Disc makes it easy for even novice operators to blend aggressive stainless steel welds. By alternating ceramic abrasive flaps with nonwoven surface conditioning material, these discs deliver both cutting power and refined finishing in one step. The result is faster, more consistent metal finishing with a superior surface quality that outperforms traditional flap discs.

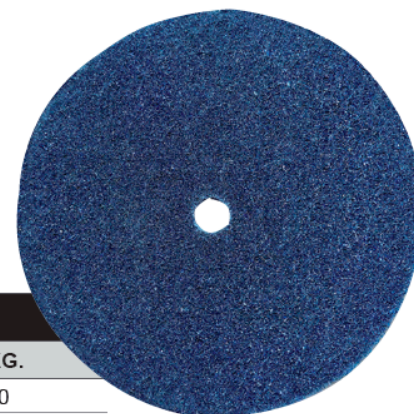

HYBRID (INTERLEAF) DISCS TYPE-29

DIA.	ARBOR/THREAD	COARSE/BROWN	MEDIUM/MAROON	VERY FINE/BLUE	OPT. RPM	MAX RPM	PKG.
4-1/2"	7/8"	245172	245173	245175	6,600	13,300	5
4-1/2"	5/8-11"	245176	245178	245179	6,600	13,300	5

5"	5/8-11"	245186	245188	245189	5,000	12,200	5

Minimum order quantity for non-stock items is 50 pcs.

SATIN FINISHING DISCS

Köln HS Satin Discs are crafted with reinforced nylon fibers, offering superior durability, longer lifespan, and enhanced cutting performance. Ideal for breaking edges, smoothing corners, and removing burrs, these discs are less abrasive than traditional coated alternatives. Their stackable design allows for a customizable wider face, making them perfect for use with bench grinders.

KÖLN HIGH STRENGTH (HS) BLUE SATIN FINISHING DISCS

DIA.	ARBOR	HS MEDIUM	MAX RPM	PKG.
6"	1/2"	347086	4,000	10
8"	1/2"	347087	3,000	10

TYPE-27 UNITIZED DISCS

Nonwoven unitized material bonded to a trimmable plastic backing plate provides strength and easily adapts to angle grinders. We have re-engineered our program to offer discs in soft (finishing), medium (blending), and hard (stock removal) formulations. Trimmable backing allows you to use more of the abrasive material. An exceptional product for creating architectural or decorative finishes on stainless steel, brass, bronze, and aluminum.

TYPE-27 UNITIZED FINISHING DISCS ON TRIMMABLE PLASTIC BACKING

4-1/2"	7/8"	245819	2S V.FINE PP	4,000	11,000	5

5/8-11 available upon request.

APPLICATION GUIDE

8A COARSE	OUR MOST AGGRESSIVE VERSION. DESIGNED FOR STOCK REMOVAL AND DEBURRING.
6S MEDIUM	IDEAL FOR EDGE BREAKING AND BLENDING TOOL MARKS.
2S FINE	HIGHLY CONFORMABLE. LEAVES A FINE BRIGHT FINISH ON STAINLESS STEEL.
2S VERY FINE PP	HIGHLY CONFORMABLE. IDEAL FOR FINE FINISHING BEFORE POLISHING.

QUICK CHANGE SURFACE CONDITIONING

RIO surface conditioning material is comprised of a dense resin/grain mixture combined with industrial-grade nylon fibers. This fibrous mesh is then woven onto a scrim back for increased durability and life. This general-duty product is perfect when a cost-effective solution is required. The quick change locking system is ideal for fast tool change preventing expensive downtime.

GENERAL DUTY RIO QUICK CHANGE SURFACE CONDITIONING DISCS
